INTERNATIONAL JOURNAL OF SOLIDS and STRUCTURES

Volume Contents and Author Index

Volume 33, 1996

PERGAMON

INTERNATIONAL JOURNAL OF SOLIDS AND STRUCTURES

Editor-in-Chief: CHARLES STEELE

Associate Editor: MARIE-LOUISE STEELE
Division of Applied Mechanics
Stanford University, Stanford,
CA 94305, U.S.A.

Board of Editors

J. D. ACHENBACH — *Northwestern University*
L. BEVILACQUA — *Federal University of Rio de Janeiro*
V. V. BOLOTIN — *Academy of Sciences, Russia*
H. D. BUI — *Ecole Polytechnique*
D. HILLS — *Oxford University*
J. HUTCHINSON — *Harvard University*
B. L. KARIHALOO — *University of Sydney*
G. MAIER — *Politecnico di Milano*
M. MIKKOLA — *Helsinki University*
F. P. J. RIMROTT — *Otto-von-Guericke-Universität Magdeburg, Germany*
R. RIVLIN — *Lehigh University*
Y. SHINDO — *Tohoku University*
H. ZORSKI — *Polish Academy of Sciences*

Editorial Advisory Board

J. H. ARGYRIS — *Stuttgart*
B. A. BOLEY — *New York*
H. LIPPMANN — *Munich*
F. NIORDSON — *Lyngby*
J. SINGER — *Haifa*
I. N. SNEDDON — *Glasgow*
F. ZIEGLER — *Vienna*
O. C. ZIENKIEWICZ — *Swansea*
E. REISSNER — *San Diego*

Production Editors: ANNETTE STEWARDSON and ZARA WILCOCK

E-mail: a.stewardson@elsevier.co.uk or z.wilcock@elsevier.co.uk

Publishing and Advertising Offices: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K.; Elsevier Science Inc., 660 White Plains Road, Tarrytown, New York 10591-5153, U.S.A.

30 issues a year (twice a month, plus extra issues in January, March, May, July, September and November). Annual Institutional Subscription Rates 1996: North, Central and South America, US$3260.00, Rest of World £2050.00. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice. Subscription enquiries from customers in The Americas should be sent to: Elsevier Science Customer Support Department, P.O. Box 945, New York, NY 10010, U.S.A., for customers in Japan to: Elsevier Science Customer Support Department, 9-15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106, Japan, for customers in the Asia Pacific to: Elsevier Science (Singapore) Pte Ltd, No. 1 Temasek Avenue, 17-01 Millenia Tower, Singapore 039192, and for the rest of the world to: Elsevier Science Customer Support Department, P.O. Box 211, 1001 AE Amsterdam, The Netherlands.

Back Issues

Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Elsevier Science offices.

Copyright © 1996 Elsevier Science Ltd. All rights reserved.

Periodicals Postage paid at Newark, New Jersey and additional entry points. The International Journal of Solids and Structures (ISSN 0020–7683) is published 30 times per year in one volume (twice a month, plus extra issues in January, March, May, July, September and November), by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. The annual subscription in the U.S.A. is $3260. The International Journal of Solids and Structures is distributed by Mercury Airfreight International Ltd, 10 Camptown Road, Irvington, New Jersey 07111-1105. Postmaster: Please send address corrections to International Journal of Solids and Structures, c/o Elsevier Science Regional Sales Office, Customer Support Department, 655 Avenue of the Americas, New York, NY 10010, U.S.A.

It is a condition of publication that manuscripts submitted to the journal are original and have not been published or submitted elsewhere. In a covering letter, authors must affirm that the manuscript has not been published nor submitted for publication elsewhere. The authors must agree not to publish elsewhere a paper published by the Journal. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature, and translations. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

Volume Contents

NUMBER 1

D. Johnson	1	Automated yield-line analysis of orthotropic slabs
J. Wang and **K. Schweizerhof**	11	Boundary-domain element method for free vibration of moderately thick laminated orthotropic shallow shells
Z. G. Zhao and **J. P. Dempsey**	19	Planar forcing of floating ice sheets
S. S. Pageau and **S. B. Biggers, Jr**	33	A finite element approach to three-dimensional singular stress states in anisotropic multi-material wedges and Junctions
Y. Qi and **N. F. Knight, Jr**	49	A refined first-order shear-deformation theory and its justification by plane-strain bending problem of laminated plates
J. L. Beuth and **S. H. Narayan**	65	Residual stress-driven delamination in deposited multi-layers
N. G. Stephen and **P. J. Wang**	79	On Saint-Venant's principle in pin-jointed frameworks
A. Benallal and **C. Comi**	99	Localization analysis via a geometrical method
A. Carini	121	Colonnetti's minimum principle extension to generally non-linear materials
	145	Announcements

NUMBER 2

Ch. Tsakmakis	149	An analysis of rate- and material parameter-dependent limiting cases in viscoplasticity laws
V. I. Fabrikant	167	Complete solution to the problem of an external circular crack in a transversely isotropic body subjected to arbitrary shear loading
M. Ozturk and **F. Erdogan**	193	Axisymmetric crack problem in bonded materials with a graded interfacial region
P.-L. Larsson, A. E. Giannakopoulos, E. Söderlund, D. J. Rowcliffe and **R. Vestergaard**	221	Analysis of Berkovich indentation
Guo-Qiang Li and **B. S. Choo**	249	A continuous-discrete approach to the free vibration analysis of stiffened pierced walls on flexible foundations

M. K. Kassir, J. Xu and K. K. Bandyopadyay	265	Rotatory and horizontal vibrations of a circular surface footing on a saturated elastic half-space
D. Liu and W. J. Stronge	283	Deformation of simply supported circular plate by central pressure pulse

NUMBER 3

L. Zhu	301	Transient deformation modes of square plates subjected to explosive loadings
A. Teter and Z. Kolakowski	315	Interactive buckling of thin-walled open elastic beam-columns with intermediate stiffeners
D. N. Dai, D. A. Hills and D. Nowell	331	Formulation and implementation of the eigenstrain method employing higher order elements
T.-Y. Zhang and P. Tong	343	Fracture mechanics for a mode III crack in a piezoelectric material
M. Z. Ahmed and F. E. Weisgerber	361	Torsion constant for matrix analysis of structures including warping effect
T. Y. Kam, H. F. Sher, T. N. Chao and R. R. Chang	375	Predictions of deflection and first-ply failure load of thin laminated composite plates via the finite element approach
T. Inoue and H. Koguchi	399	Influence of the intermediate material on the order of stress singularity in three-phase bonded structure
G. A. Lesieutre and K. Govindswamy	419	Finite element modeling of frequency-dependent and temperature-dependent dynamic behavior of viscoelastic materials in simple shear
K. A. Lazopoulos	433	Second order displacement fields of a thick elastic plate under thrust—the incompressible case

NUMBER 4

C. W. Lim and K. M. Liew	451	Vibration of shallow conical shells with shear flexibility: a first-order theory
H. Matsunaga	469	In-plane vibration and stability of shallow circular arches subjected to axial forces
N. Point and E. Sacco	483	A delamination model for laminated composites
L. A. Godoy and D. T. Mook	511	Higher-order sensitivity to imperfections in bifurcation buckling analysis
M. Savoia	521	On the accuracy of one-dimensional models for multilayered composite beams

D. Chen and **S. Cheng** 545 Non-linear analysis of prestretched circular membrane and a modified iteration technique

P. I. Kattan and **G. Z. Voyiadjis** 555 Damage-plasticity in a uniaxially loaded composite lamina: overall analysis

M. J. Poldneff and **J. S. Arora** 577 Design sensitivity analysis in dynamic thermovisco-elasticity with implicit integration

Chang-Gen Deng 595 Tracing equilibrium paths of elastic plates under different loading paths

609 Announcement

NUMBER 5

Y. Z. Chen and **N. Hasebe** 611 Properties of eigenfunction expansion form for the rigid line problem in dissimilar media

M. S. Hoo Fatt 629 Fully-plastic crack propagation in stiffened plates

D. Celentano, S. Oller and **E. Oñate** 647 A coupled thermomechanical model for the solidification of cast metals

R. Ganesan 675 Probabilistic analysis of non-self-adjoint mechanical systems with uncertain parameters

H. Petryk and **K. Thermann** 689 Post-critical plastic deformation of biaxially stretched sheets

P. H. Feenstra and **R. de Borst** 707 A composite plasticity model for concrete

W. H. Müller, H. Gao, C.-H. Chiu and **S. Schmauder** 731 A semi-infinite crack in front of a circular, thermally mismatched heterogeneity

K. Heiduschke 747 Computational aspects of the logarithmic strain space description

NUMBER 6

M. B. Rubin, D. Elata and **A. V. Attia** 761 Modeling added compressibility of porosity and the thermomechanical response of wet porous rock with application to Mt. Helen tuff

P. Šimáček and **V. N. Kaliakin** 795 Notes on the behavior of transversely loaded in-extensible plates

P. A. Fotiu and **F. Ziegler** 811 The propagation of spherical waves in rate-sensitive elastic-plastic materials

Z. Q. Xia and **S. Łukasiewicz**	835	Effect of temperature changes on damping properties of sandwich cylindrical panels
Z. C. Xi, L. H. Yam and **T. P. Leung**	851	Semi-analytical study of free vibration of composite shells of revolution based on the Reissner-Mindlin assumption
X.-M. Wang and **Y.-P. Shen**	865	The conservation laws and path-independent integrals with an application for linear electro-magneto-elastic media
K. H. Lee and **L. Cao**	879	A predictor-corrector zig-zag model for the bending of laminated composite plates
A. D. Kerr and **N. E. Soicher**	899	A peculiar set of problems in linear structural mechanics
	913	Announcements

NUMBER 7

F. Davì	917	Dynamics of linear anisotropic rods
J. Aboudi, M.-J. Pindera and **S. M. Arnold**	931	Thermoelastic theory for the response of materials functionally graded in two directions
T. Mizusawa and **T. Kato**	967	Application of the spline prism method to analyse vibration of thick circular cylindrical panels
J. S. Lee and **L. Z. Jiang**	977	Exact electroelastic analysis of piezoelectric laminae via state space approach
J. Lubliner and **F. Auricchio**	991	Generalized plasticity and shape-memory alloys
B. B. Guzina and **R. Y. S. Pak**	1005	Elastodynamic Green's functions for a smoothly heterogeneous half-space
C. Boutin	1023	Microstructural effects in elastic composites
Yanyao Jiang and **Huseyin Sehitoglu**	1053	Comments on the Mroz multiple surface type plasticity models

NUMBER 8

A. M. Maniatty and **J.-S. Yu**	1069	Effect of elasticity on slip system activity in face-centered cubic crystals: a numerical study
M. Frémond and **B. Nedjar**	1083	Damage, gradient of damage and principle of virtual power
Zhang Zheng, Wu Guoxun and **Zhang Xing**	1105	Closed form solution of stress and strain concentration factors of axially symmetric bodies with small scale plasticity by means of the conservative integral method

M. Ostoja-Starzewski and **H. Ilies** 1119 The Cauchy and characteristic boundary value problems of random rigid-perfectly plastic media

D. Raboud, M. G. Faulkner and **A. W. Lipsett** 1137 A segmental approach for large three-dimensional rod deformations

H. R. Dorfi, H. R. Busby and **M. Janssen** 1157 Ultrasonic stress measurements based on the generalized acoustic ratio technique

V. I. Kushch 1175 Elastic equilibrium of a medium containing a finite number of aligned spheroidal inclusions

S. Basu and **R. Narasimhan** 1191 Finite element simulation of mode I dynamic, ductile fracture initiation

F. Hild, A. Burr and **F. A. Leckie** 1209 Matrix cracking and debonding of ceramic–matrix composites

B. Tabarrok, C. M. Leech and **J. B. Haddow** 1221 Two theorems on statical indeterminacy of structures

NUMBER 9

V. V. Bolotin and **V. L. Lebedev** 1229 Analytical model of fatigue crack growth retardation due to overloading

Jianqiang Fan and **Guangquan Zhou** 1243 Statistical analysis of brittle solid damage based on network model

C. P. Pantelides 1257 Stability of elastic bars on uncertain foundations using a convex model

P. Ponte Castañeda and **M. Zaidman** 1271 The finite deformation of nonlinear composite materials—I. Instantaneous constitutive relations

M. Zaidman and **P. Ponte Castañeda** 1287 The finite deformation of nonlinear composite materials—II. Evolution of the microstructure

Hui Fan, Kam-Yim Sze and **Wei Yang** 1305 Two-dimensional contact on a piezoelectric half-space

R. T. Tenchev 1317 Shear lag in orthotropic beam flanges and plates with stiffeners

P. F. Pai and **A. N. Palazotto** 1335 Large-deformation analysis of flexible beams

Q. H. Zuo and **H. L. Schreyer** 1355 Flutter and divergence instability of nonconservative beams and plates

Y. Goto, T. Kasugai and **M. Obata** 1369 Letter to the editor

P. F. Pai and **A. N. Palazotto** 1371 Authors' closure

NUMBER 10

L. S. Ong, S. T. J. Cheung and A. S. Tooth	1375	Cylindrical shell subject to local loads applied on an arbitrarily shaped area
C. E. S. Cesnik, V. G. Sutyrin and D. H. Hodges	1387	Refined theory of composite beams: the role of short-wavelength extrapolation
H. P. Lee	1409	Dynamic stability of a tapered cantilever beam on an elastic foundation subjected to a follower force
J. D. Renton	1425	Generalized beam theory and modular structures
Jin H. Huang	1439	Equivalent inclusion method for the work-hardening behavior of piezoelectric composites
J. E. Saliba, S. Dhar, D. J. Grove and N. S. Brar	1453	Prediction of force–time histories in thick steel plates due to penetration by tungsten rods at velocities of 1.5–2.5 km s^{-1}
Y.-M. Liang and K. M. Liechti	1479	On the large deformation and localization behavior of an epoxy resin under multiaxial stress states
K. Runesson, D. Perić and S. Sture	1501	Effect of pore fluid compressibility on localization in elastic-plastic porous solids under undrained conditions
A. Cimetière and A. Léger	1519	Some problems about elastic–plastic post-buckling

NUMBER 11

C. R. Picu and V. Gupta	1535	Stress singularities at triple junctions with freely sliding grains
P. Steinmann, C. Miehe and E. Stein	1543	Fast transient dynamic plane stress analysis of orthotropic Hill-type solids at finite elastoplastic strains
C. R. Picu	1563	Singularities of an interface crack impinging on a triple grain junction
Y. Huang, A. Chandra, Z. Q. Jiang, X. Wei and K. X. Hu	1575	The numerical calculation of two-dimensional effective moduli for microcracked solids
K. Kang, C. W. Bert and A. G. Striz	1587	Static analysis of a curved shaft subjected to end torques
R. C. Batra, X. Q. Liang and J. S. Yang	1597	The vibration of a simply supported rectangular elastic plate due to piezoelectric actuators
C. S. Desai and J. Toth	1619	Disturbed state constitutive modeling based on stress–strain and nondestructive behavior
K. Sobczyk, S. Wedrychowicz and B. F. Spencer Jr	1651	Dynamics of structural systems with spatial randomness
	1671	Announcement

NUMBER 12

T.-P. Chang and **Y.-N. Liu**	1673	Dynamic finite element analysis of a nonlinear beam subjected to a moving load
S. Beissel and **T. Belytschko**	1689	On patterns of deformation in phase transformations and Lüders bands
J. Lufrano and **P. Sofronis**	1709	Numerical analysis of the interaction of solute hydrogen atoms with the stress field of a crack
Yeh-Hung Lai, M. D. Rakestraw and **D. A. Dillard**	1725	The cracked lap shear specimen revisited—a closed form solution
Pham Duc Chinh	1745	On macroscopic elastic and conductivity properties of perfectly random cell composites
C. L. Hom and **N. Shankar**	1757	A finite element method for electrostrictive ceramic devices
O. V. Gendelman and **L. I. Manevitch**	1781	The description of polyethylene crystal as a continuum with internal degrees of freedom
M. P. Bendsøe, J. M. Guedes, S. Plaxton and **J. E. Taylor**	1799	Optimization of structure and material properties for solids composed of softening material
	1815	Announcement

NUMBER 13

N. Strömberg, L. Johansson and **A. Klarbring**	1817	Derivation and analysis of a generalized standard model for contact, friction and wear
T. L. Power and **S. Kyriakides**	1837	Circumferential stiffeners as buckle arrestors in long panels
B. A. Ammons and **M. Vable**	1853	Boundary element analysis of cracks
J. A. Kallivayalil, C. Y. Hui and **A. T. Zehnder**	1867	A method for thermo-mechanical analysis of steady state dynamic crack growth
M. Tadi, H. Rabitz, Young Sik Kim, A. Askar, J. H. Prevost and **J. B. McManus**	1891	Interior energy focusing within an elasto-plastic material
B. Moran, Y. A. Chu and **G. B. Olson**	1903	Homogeneous nucleation of a solid–solid dilatational phase transformation
K. M. Liew, Y. Xiang and **S. Kitipornchai**	1921	Navier's solution for laminated plate buckling with prebuckling in-plane deformation
Jiann-Quo Tarn, Yi-Bin Wang and **Yung-Ming Wang**	1939	Three-dimensional asymptotic finite element method for anisotropic inhomogeneous and laminated plates

NUMBER 14

M. Lucchesi, C. Padovani and N. Zani	1961	Masonry-like solids with bounded compressive strength
J.-B. Leblond, S.-E. Mouchrif and G. Perrin	1995	The tensile tunnel-crack with a slightly wavy front
A. Azhdari and S. Nemat-Nasser	2023	Hoop stress intensity factor and crack-kinking in anisotropic brittle solids
M. Fränkle, D. Munz and Y. Y. Yang	2039	Stress singularities in a bimaterial joint with inhomogeneous temperature distribution
H. Takabatake, N. Yanagisawa and T. Kawano	2055	A simplified analysis of rectangular cellular plates
J. L. Alcaraz, J. M. Martínez-Esnaola and J. Gil-Sevillano	2075	An analytical approach to the stress field in the extrusion of bimetallic tubes
E. V. Iarve	2095	Spline variational three dimensional stress analysis of laminated composite plates with open holes
	2119	Announcements

NUMBER 15

T. W. Ulrich, F. A. Moslehy and A. J. Kassab	2123	A BEM based pattern search solution for a class of inverse elastostatic problems
C. B. York	2133	Influence of continuity and aspect-ratio on the buckling of skew plates and plate assemblies
J. Shi	2161	The nonlinear response of a family of simple three-dimensional trusses
L. A. Godoy	2177	Sensitivity of post-critical states to changes in design parameters
R. K. N. D. Rajapakse and D. Gross	2193	Traction and contact problems for an anisotropic medium with a cylindrical borehole
Xin-Lin Gao	2213	A mathematical analysis of the elasto-plastic anti-plane shear problem of a power-law material and one class of closed-form solutions
Chien-Ching Ma and Lyang-Rung Hwang	2225	Transient response of an antiplane inclined subsurface crack subjected to dynamic moving loadings
L. B. Lessard, A. S. Schmidt and M. M. Shokrieh	2243	Three-dimensional stress analysis of free-edge effects in a simple composite cross-ply laminate
G. Frantziskonis	2261	Letter to the editor

NUMBER 16

R. L. Fosdick and **G. F. Royer-Carfagni**	2267	The static state of a two-phase solid mixture in a stressed elastic bar
Ding Haojiang, Chenbuo and **Liangjian**	2283	General solutions for coupled equations for piezoelectric media
Bo-Hua Sun, Wei Zhang, Kai-Yuan Yeh and **F. P. J. Rimrott**	2299	Exact displacement solution of arbitrary degree paraboloidal shallow shell of revolution made of linear elastic materials
Z. Q. Jiang, A. Chandra and **Y. Huang**	2309	A hybrid micro-macro BEM with micro-scale inclusion-crack interactions
K. N. Khatri	2331	Antisymmetric vibrations of multilayered conical shells with constrained viscoelastic layers
H. H. Vaziri	2357	A simple numerical model for analysis of propped embedded retaining walls
P. N. Harrison and **E. R. Johnson**	2377	A mixed variational formulation for interlaminar stresses in thickness-tapered composite laminates
J. Carmeliet and **R. de Borst**	2401	Authors' closure

NUMBER 17

Kuang-Chong Wu and **Chiun-Tsan Chen**	2403	Stress analysis of anisotropic elastic V-notched bodies
E. Byskov, C. D. Christensen and **K. Jørgensen**	2417	Elastic postbuckling with nonlinear constraints
J. J. Ditri and **D. Hongerholt**	2437	Stress distribution determination in isotropic materials via inversion of ultrasonic Rayleigh wave dispersion data
C. R. Picu	2453	Stress singularities at vertices of conical inclusions with freely sliding interfaces
M. Savoia and **N. Tullini**	2459	Beam theory for strongly orthotropic materials
X. D. Wang and **S. A. Meguid**	2485	On the general treatment of an oblique crack near a bimaterial interface under antiplane loading
S. Oller, E. Oñate, J. Miquel and **S. Botello**	2501	A plastic damage constitutive model for composite materials
Chao-Hsun Chen and **Chiang-Ho Cheng**	2519	Effective elastic moduli of misoriented short-fiber composites
	2541	Announcement

NUMBER 18

I. J. Beyerlein, S. L. Phoenix and **A. M. Sastry**	2543	Comparison of shear-lag theory and continuum fracture mechanics for modeling fiber and matrix stresses in an elastic cracked composite lamina
Ding Haojiang and **Chen Weiqiu**	2575	Nonaxisymmetric free vibrations of a spherically isotropic spherical shell embedded in an elastic medium
F. Emeriault and **B. Cambou**	2591	Micromechanical modelling of anisotropic non-linear elasticity of granular medium
A. V. Cherkaev and **L. V. Gibiansky**	2609	Extremal structures of multiphase heat conducting composites
Y. Huang, C. Liu and **A. J. Rosakis**	2625	Transonic crack growth along a bimaterial interface: an investigation of the asymptotic structure of near-tip fields
K. M. Liew, J.-B. Han and **Z. M. Xiao**	2647	Differential quadrature method for thick symmetric cross-ply laminates with first-order shear flexibility
T. X. Yu, J. L. Yang, S. R. Reid and **C. D. Austin**	2659	Dynamic behaviour of elastic-plastic free-free beams subjected to impulsive loading
M. Olia and **J. N. Rossettos**	2681	Analysis of adhesively bonded joints with gaps subjected to bending

NUMBER 19

N. N. V. Prasad, M. H. Aliabadi, and **D. P. Rooke**	2695	The dual boundary element method for transient thermo-elastic crack problems
L. Kogan, C.-Y. Hui and **V. Molkov**	2719	Stress and induction field of a spheroidal inclusion or a penny-shaped crack in a transversely isotropic piezo-electric material
C. O. Chang, J. J. Hwang and **C. S. Chou**	2739	Modal precession of a rotating hemispherical shell
Q. Lan, G. A. C. Graham and **A. P. S. Selvadurai**	2759	Certain two-punch problems for an elastic layer
Pei-Ling Liu and **Hwei-Tser Lin**	2775	Direct identification of non-uniform beams using static strains
Yue-Sheng Wang and **Duo Wang**	2789	Scattering of elastic waves by a rigid cylindrical inclusion partially debonded from its surrounding matrix—I. SH case
Yue-Sheng Wang and **Duo Wang**	2817	Scattering of elastic waves by a rigid cylindrical inclusion partially debonded from its surrounding matrix—II. P and SV cases
H.-B. Mühlhaus and **F. Oka**	2841	Dispersion and wave propagation in discrete and continuous models for granular materials

NUMBER 20–22

M. Ortiz	2859	Obituary: Juan Carlos Simo, 1952–1994
F. Armero and **K. Garikipati**	2863	An analysis of strong discontinuities in multiplicative finite strain plasticity and their relation with the numerical simulation of strain localization in solids
Z. P. Bažant	2887	Finite strain generalization of small-strain constitutive relations for any finite strain tensor and additive volumetric-deviatoric split
G. T. Camacho and **M. Ortiz**	2899	Computational modelling of impact damage in brittle materials
I. Carol and **K. Willam**	2939	Spurious energy dissipation/generation in stiffness recovery models for elastic degradation and damage
N. Chien, T. Honein and **G. Herrmann**	2959	Dissipative systems, conservation laws and symmetries
M. A. Crisfield and **G. F. Moita**	2969	A unified co-rotational framework for solids, shells and beams
C. Freischläger and **K. Schweizerhof**	2993	On a systematic development of trilinear three-dimensional solid elements based on Simo's enhanced strain formulation
G. A. Holzapfel and **J. C. Simo**	3019	A new viscoelastic constitutive model for continuous media at finite thermomechanical changes
M. Kamiński and **M. Kleiber**	3035	Stochastic structural interface defects in fiber composites
P. Krysl and **T. Belytschko**	3057	Analysis of thin shells by the element-free Galerkin method
R. Larsson, K. Runesson and **S. Sture**	3081	Embedded localization band in undrained soil based on regularized strong discontinuity—theory and FE-analysis
C. Miehe	3103	Multisurface thermoplasticity for single crystals at large strains in terms of Eulerian vector updates
A. Molinari and **M. El Mouden**	3131	The problem of elastic inclusions at finite concentration
J. C. Nagtegaal and **D. D. Fox**	3151	Using assumed enhanced strain elements for large compressive deformation
J. Oliver, S. Oller and **J. C. Cante**	3161	A plasticity model for simulation of industrial powder compaction processes
S. Oller and **E. Oñate**	3179	A hygro-thermo-mechanical constitutive model for multiphase composite materials
E. Rizzi, G. Maier and **K. Willam**	3187	On failure indicators in multi-dissipative materials

D. Roehl and **E. Ramm**	3215	Large elasto-plastic finite element analysis of solids and shells with the enhanced assumed strain concept
H. L. Schreyer and **M. K. Neilsen**	3239	Discontinuous bifurcation states for associated smooth plasticity and damage with isotropic elasticity
L. J. Sluys and **R. de Borst**	3257	Failure in plain and reinforced concrete—an analysis of crack width and crack spacing
E. A. de Souza Neto, D. Perić, M. Dutko and **D. R. J. Owen**	3277	Design of simple low order finite elements for large strain analysis of nearly incompressible solids
V. Tvergaard and **J. W. Hutchinson**	3297	Effect of strain-dependent cohesive zone model on predictions of crack growth resistance
P. Wriggers, R. Eberlein and **S. Reese**	3309	A comparison of three-dimensional continuum and shell elements for finite plasticity
J. Mazars and **G. Pijaudier-Cabot**	3327	From damage to fracture mechanics and conversely: a combined approach

NUMBER 23

M. Y. Chung and **T. C. T. Ting**	3343	Piezoelectric solid with an elliptic inclusion or hole
Han Zhao and **G. Gary**	3363	On the use of SHPB techniques to determine the dynamic behavior of materials in the range of small strains
D. Karagiozova and **N. Jones**	3377	Multi-degrees of freedom model for dynamic buckling of an elastic–plastic structure
H. Sosa and **N. Khutoryansky**	3399	New developments concerning piezoelectric materials with defects
C. Polizzotto and **G. Borino**	3415	Shakedown and steady-state responses of elastic–plastic solids in large displacements
A. Molinari and **Y. Germain**	3439	Self heating and thermal failure of polymers sustaining a compressive cyclic loading
P.-Å. Jansson	3463	Anti-plane elastic wave scattering from a rough volumetric crack
S. Faanes	3477	Distribution of contact stresses along a worn fretting surface
	3491	Corrigendum
	3493	Announcements

NUMBER 24

S. Trimula, H. Madanaraj, A. K. Kaw, G. H. Besterfield and **J. Ye**	3497	Effect of extrinsic and intrinsic factors on an indentation test

A. A. Singace and **H. ElSobky** 3517 Further experimental investigation on the eccentricity factor in the progressive crushing of tubes

E. T. Hambly and **C. R. Calladine** 3539 Buckling experiments on damaged cylindrical shells

A. I. Beltzer 3549 Entropy characterization of finite elements

Kezhun Li and **W. Goldsmith** 3561 A phenomenological model for perforation of moderately thick plates by tumbling projectiles

R. Artan and **T. Yelkenci** 3577 Rectangular rigid stamp on a nonlocal elastic half-plane

A. Dall'asta 3587 On the coupling between three-dimensional bodies and slipping cables

Z. Qian, S. Takezono and **K. Tao** 3601 Effect of loading frequency on fatigue crack growth under high temperature

M. Ryvkin 3611 Mode III crack in a laminated medium

E. Suhir 3627 Shock-excited vibrations of a conservative Duffing oscillator with application to shock protection in portable electronics

M. Köhl and **G. Dhondt** 3643 Letter to the editor

C. W. Bert and **T. Paul** 3645 Authors' closure

NUMBER 25

V. G. Sutyrin and **D. H. Hodges** 3649 On asymptotically correct linear laminated plate theory

M. Andersson 3673 Stress distribution and crack initiation for an elastic contact including friction

N. S. Ottosen and **M. Ristinmaa** 3697 Corners in plasticity—Koiter's theory revisited

K. T. Ramesh and **S. Narasimhan** 3723 Finite deformations and the dynamic measurement of radial strains in compression Kolsky bar experiments

E. Hanus, H. Maitournam and **K. Dang Van** 3739 Pressure rolling contact: steady state flow analysis and comparison with experimental data

W. J. Bottega and **M. A. Loia** 3755 Edge debonding in patched cylindrical panels

Z. Kolakowski 3779 A semi-analytical method for the analysis of the interactive buckling of thin-walled elastic structures in the second order aproximation

3791 Announcements

NUMBER 26

S. W. Case and **K. L. Reifsnider** 3795 Micromechanical analysis of fiber fracture in unidirectional composite materials

Chih-Ping Wu, Jiann-Quo Tarn and **Shu-Man Chi**	3813	An asymptotic theory for dynamic response of doubly curved laminated shells
C.-Y. Wang, J. D. Achenbach and **S. Hirose**	3843	Two-dimensional time domain BEM for scattering of elastic waves in solids of general anisotropy
C. K. Chao and **J. Y. Lee**	3865	Interaction between a crack and a circular elastic inclusion under remote uniform heat flow
C. Comi and **A. Corigliano**	3881	On uniqueness of the dynamic finite-step problem in gradient-dependent softening plasticity
T. Inoue	3903	Analysis of plastic buckling of steel plates in shear based on the Tresca yield criterion
J. S. Popovics and **J. L. Rose**	3925	An approach for wave velocity measurement in solid cylindrical rods subjected to elastic impact
G. Aşkar Altay and **M. Cengiz Dökmeci**	3937	Some variational principles for linear coupled thermo-elasticity
	3949	Announcement

NUMBER 27

E. Karapetian and **M. Kachanov**	3951	Three-dimensional interactions of a circular crack with dipoles, centers of dilatation and moments
M. Grédiac	3969	On the direct determination of invariant parameters governing anisotropic plate bending problems
B. Yang and **J. Zhou**	3983	Semi-analytical solution of 2-D elasticity problems by the strip distributed transfer function method
A. A. Khdeir	4007	Thermoelastic analysis of cross-ply laminated circular cylindrical shells
Z. Q. Yue	4019	Elastic field for eccentrically loaded rigid plate on multilayered solids
X.-M. Wang, S. Gao and **Y.-H. Chen**	4051	Further investigation for the macro–microcrack interaction I—in the infinite isotropic body
F. Guarracino, V. Minutolo, L. Nunziante and **G. Falsone**	4065	A complete set of corollaries of the reciprocal theorems in elasticity
K. Suzuki, G Shikanai and **A. W. Leissa**	4079	Free vibrations of laminated composite non-circular thick cylindrical shells

NUMBER 28

Hyung Jip Choi	4101	Bonded dissimilar strips with a crack perpendicular to the functionally graded interface

F. C. S. Carvalho and **J. F. Labuz**	4119	Experiments on effective elastic modulus of two-dimensional solids with cracks and holes
L. M. Brock	4131	Effects of thermoelasticity and a von Mises condition in rapid steady-state quasi-brittle fracture
B. Skallerud	4143	A mixed mode I/II inelastic line spring
Zhengfang Qian and **Han C. Wu**	4167	A 2-D texture study based on a double-slip model of polycrystal plasticity with analysis of thin-walled tubes under torsion
A. F. Vakakis and **C. Cetinkaya**	4195	Dispersion of stress waves in one-dimensional semi-infinite, weakly coupled layered systems
R. E. Diaz-Contreras and **S. Nomura**	4215	Numerical Green's function approach to finite-sized plate analysis
Chien-Ching Ma and **Kuo-Cheng Huang**	4223	Analytical transient analysis of layered composite medium subjected to dynamic inplane impact loadings
Dar-Yun Chiang and **J. L. Beck**	4239	A transformation method for implementing classical multi-yield-surface theory using the hardening rule of Mroz
